Engine/Fuel Type: diesel

Engine Hours: 3770

Engine Power: 165|horsepower

Tanks

Fresh Water Tanks: 1343Gallons

Fuel Tanks: 1466Gallons

General Boat Description

This handsome Carl Schumacher designed 77 foot custom carbon performance sloop was built by NORTHERN MARINE LLC in Seattle in 2002. She is a comfortable and capable cruiser easily sailed by 2 with accommodations for 8. With a fin keel and bulb, and carbon composite rudder, her hull is constructed of 5 outside plies of carbon fiber, 1 inch balsa core, 4 inside carbon plies, with a balance of cold molded cedar final interior skin and integral laminated carbon fiber unidirectional chainplates. The deck is a carbon fiber and balsa core sandwich with teak overlay. Cascadia is a 7/8 rigged fractional sloop with and inner forestay and running back check stays. Twin wheel in a large open aft cockpit. The deck layout has a trunk cabin forward with the pilot house aft. Her beautiful interior styling is traditional with Madrona wood veneers chosen from 4 trees and matched for each cabin. All trim is solid Madrona. She is powered by a Yanmar4LHA-DJE 165 hp four cylinder diesel engine with shaft drive. Cascadia has always been maintained to the highest standard by her full time professional crew. Please see the full spec's and call for more information on this quality performance cruiser.

Cascadia is offered through a lease to own program with International Seakeepers Society.
